

Recycling technology (with memes)

*BY Costantino Antonio Francesco AND
Francesco Schipani*

The technology waste is becoming a big problem

Then, how can we fix it?
there are 4 principal methods
to recycle technology.

DONATING: you can donate to charity, or donate to APPLE and apple will create new phones with reusable parts.

RESALE: you can fix and then sell your phone to strangers and they will reuse it until it dies.

EVALUATION AND EXCHANGE: some phone companies can give you some deals, like you give them back your old phone and they give you some gift cards.

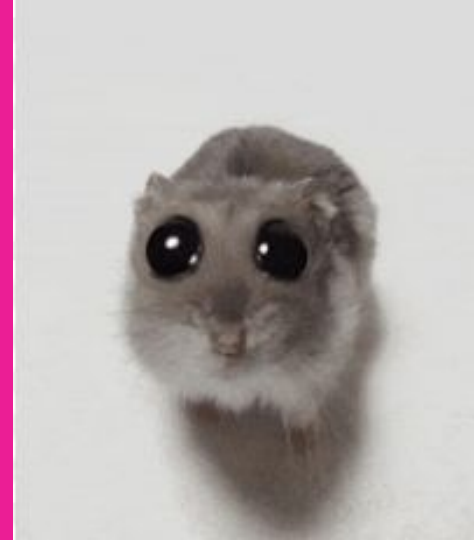

UPCYCLING: you can recycle your tablet and make it, like to an hard disk or something else.

What will happen if you don't recycle?

POLLUTION FROM TOXIC SUBSTANCES: the electronic devices could put a lot of pollution on the planet and there are super dangerous substances like mercury that could cause poisoning.

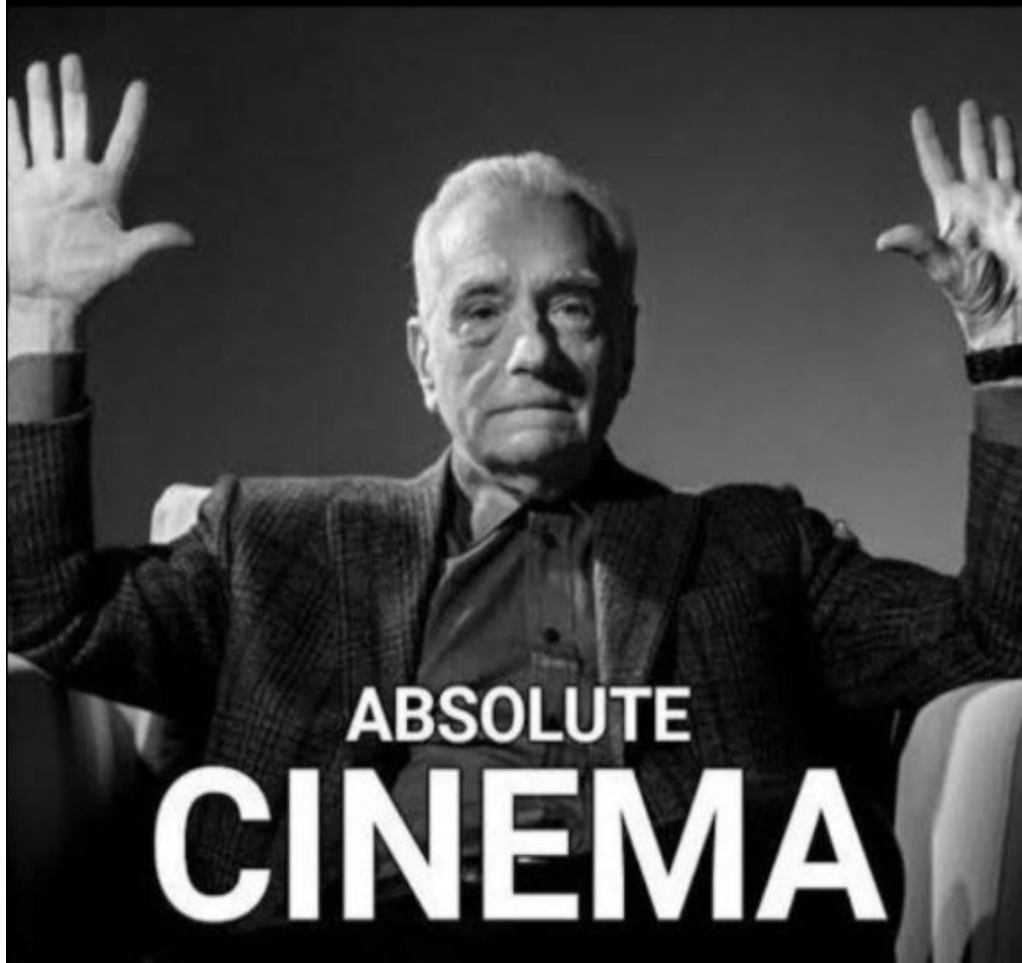

INCREASE IN CARBON EMISSIONS.

PLEASE RECYCLE FOR ME, OR YOU WILL MAKE ME SAD

**This is the
end,
thanks for
your
attention**
